Glossary

1. Introduction

The goal of this project is to design, implement and test a web application for making microposts, similar to twitter. The application will have two types of users: a regular user and an administrator. The regular user can follow other users, make posts with whats on their mind and also upload photos of themselves. An admin can manage each user and their posts. Moreover they can do whatever a regular user can.

2. Glossary

Term	Definition and Information	Format	Validation Rules
Micropost	Message of up to 280 characters with photo attached (optional).		
Login	To authenticate		
Signup	Create an account		
Follow	Subscribe to someones account and receive updates from their posts and activity in your feed.		
Feed	Place where someone can see microposts from the users they follow
